

----- FOR IMMEDIATE RELEASE -----

CealTec™ Products Inc., is pleased to announce they will be attending the 2011 iFLEX International Fast Lube Expo in Dallas Texas from August 9th – 11th, 2011 that is being presented by the Automobile Oil Change Association and will be exhibiting a New Revolutionary Self-Healing Engine Treatment branded CealDoctor™ .

CealDoctor™ can be used in almost any type of fossil fueled, combustion engine within the motorcycle, automotive, industrial equipment and marine applications. Metal nano powder is used to recover the damaged parts of an engine. As a result of the parts of the engine being targeted are metal, CealDoctor™ can improve engine performance in the following areas:

- Reduces harmful CO2 Emissions
- Contributes to passing government emissions testing
- Reduces oil consumption
- Extends the life cycle of many engines
- Reduces smoke by 30-40%
- Improves engine power by 5-15%
- Improves fuel economy by 5-15%
- Reduces noise and vibration
- Reduces oil consumption
- Reduces maintenance costs

During the Expo, Cealtec™ will be making a formal presentation of this revolutionary technology at the iFLEX OK Coral to the members of AOCA and iFLEX 2011 exhibitors and attendees.

If you are interested in meeting with us during this event, please send an email to:

ABOUT **CealDoctor™**

CealDoctor™ products are self-healing lubricants designed at the nano-technology level and formulated for most types of fossil fueled engines and mechanical devices that require internal cures for damaged surfaces due to wear or foreign particle damage. Cracks can be healed in many situations to restore original OEM performance.
